

S E C R E TE N C L O S U R EPSYCHOLOGICAL WARFAREMemorandum by the Navy Member, SWNCC

1. I note that SWNCC 304/4 as presented by the SWNCC Subcommittee for Special Studies and Evaluations, goes beyond the limits of the problem stated in SWNCC 304/3, and that no discussion of the problem is included in the paper from which one may follow through to a logical evaluation of the conclusions and recommendations offered. In this connection, it would seem that the assumption as stated in paragraph 2, should be a part of any such discussion. Therefore, I recommend that SWNCC 304/4 be returned to the Subcommittee for further study and for the inclusion of sufficient discussion to justify the conclusions and recommendations to be drawn therefrom.

2. I believe, however, that the Appendix to SWNCC 304/4 constitutes a suitable reply to the request of the Director, Legislative Reference Service, Library of Congress. I do not, on the other hand, consider that the Appendix need be classified as Restricted. In view of the fact that this reply should no longer be delayed, I approve specifically of paragraphs 6 and 8 (b), subject to declassification of the Appendix.

NAVY review(s) completed.

SWNCC 304/5
